Agile Development in 3 Simple Steps

STEP 1

Backlog

| feature | feature | feature |
feature	feature	feature
feature	feature	feature
feature	feature	feature
feature	feature	feature
feature	feature	feature
feature	feature	feature
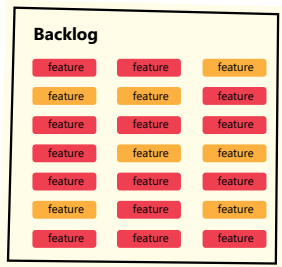

Create a backlog

👉 Collect the list of features that the clients would like to have.

STEP 2

Backlog

feature	feature	feature
feature	feature	feature
feature	feature	feature
feature	feature	feature
feature	feature	feature
feature	feature	feature
feature	feature	feature

⇓

Release Backlog
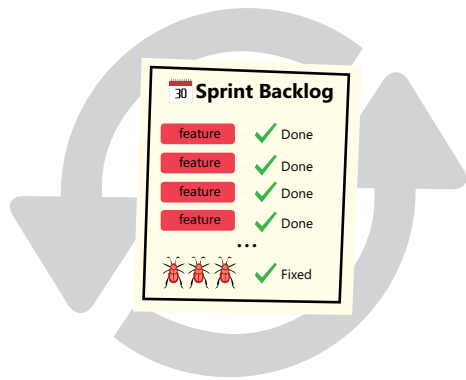

| feature |
| feature |
| feature |
| feature |
| feature |

Estimate and Prioritize

👉 Estimate how much time it will take to develop the features and assign priority to each one of them.

👉 Create the Release Backlog

STEP 3

📅30 **Sprint Backlog**

feature	✔ Done
feature	✔ Done
feature	✔ Done
feature	✔ Done
...	
🐞🐞🐞	✔ Fixed

Sprints

👉 Select high priority features from the release backlog.

👉 Develop features to complete the sprint

👉 Repeat the sprints until all features are developed.
